

WWHM Illness Policy

All members of your family (living within your household) must be without symptoms of any kind for **24 hours prior** to returning to WWHM on Monday.

*Re-admission to the nursery after diarrhea can occur when diapered children have their stool contained by the diaper (even if stool remains loose) and when toilet-trained children do not have toileting accidents.

These are the reasons to keep sick children at home:

The child does not feel well enough to participate comfortably in usual activities such as: extreme signs of tiredness, unexplained irritability or persistent crying.

The illness is on the list of symptoms or illness for which staying home is required.

Children or family members with the following symptoms or illness must be kept at home from WWHM:

DIARRHEA: frequent, loose or watery stools compared to the child's normal pattern; not caused by diet or medications.

FEVER: with behavior changes or illness.

FLU SYMPTOMS: Fever over 100 degrees F with a cough or sore throat.

Other flu symptoms can include fatigue, body aches, vomiting, and diarrhea.

COUGHING: severe, uncontrolled coughing or wheezing, rapid or difficulty breathing.

RASH: with fever.

VOMITING: Two or more episodes of vomiting in the prior 24 hours to Monday.

COVID: If you have a positive Covid test you must follow the CDC quarantine guidelines.
